# Bluebeam Cloud Solutions

A faster, more flexible way to manage end-to-end tasks on the go.

Effortlessly mark up and collaborate on project documents, and complete field workflows on the go with new cloud-based solutions from Bluebeam.
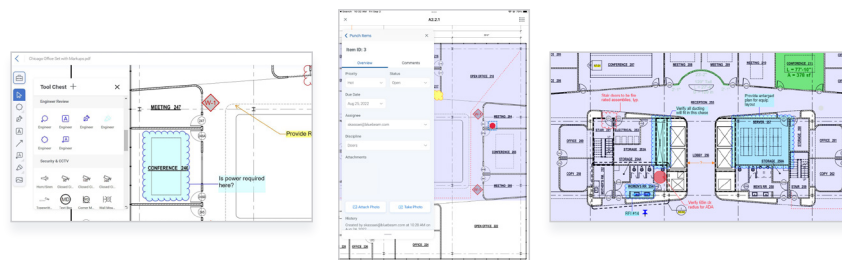

Available as an easy-to-use web or iOS app, Bluebeam Cloud is seamlessly integrated with Bluebeam Revu so you can access your work and tool sets from anywhere.

Seamlessly integrated with Revu

- Access Studio Project files and tool sets from Revu
- Utilize one set of drawings from start to finish
- Leverage existing markup data in the field

## Finish the job. Anywhere.

Streamline communication

- Customize markups and save for easy reuse
- Track all edits and preserve important project data
- Easily invite team members to collaborate in real time

Close punch items

- Assign, track and close punch items
- Organize items with Revu Spaces and attach photos
- Create punch lists from drawings and map view

Simplify RFIs & submittals

- Assign, manage and track RFIs and submittals
- Post RFIs to drawings and map view to share across devices
- Get reporting and insights

Pick up and go

With Bluebeam Cloud, you can easily **access your work** and **complete tasks on the go.**

- Work from anywhere via web or iOS device, with reliable offline support
- Securely access all Bluebeam solutions with a single login (Bluebeam ID)

Keep teams on the same page

Organize documents and data across projects and **keep the office and field in sync.**

- Maintain a source of truth by leveraging files from Revu or SharePoint, Dropbox, Box and more
- Invite internal and external team members to mark up and collaborate in real time

Make better decisions

Use map functionality to visualize, connect and organize data so you **get the info you need, where you need it.**

- Get situational awareness of the work around you by overlaying drawings and plans to existing conditions
- Analyze pre-built reports or export data to your preferred BI tool

"Bluebeam Cloud helped us close thousands of punch items in days instead of weeks. **It saved us hundreds of hours of busy work.**"

-Matt Walsh, Operations Technology Lead, Power Construction
